

Beneficial ReUse

means recycling in a **green way** with NO landfills and LOWER cost

How does it work?

Ship to **Custom Abrasives** Houma, Louisiana

loads it into a barge for one of its many cement clients.

At the cement plant spent Abrade-Away becomes a source of Fe_2O_3 for the cement plant and no longer exists as an industrial waste.

What do you get?

Lower cost than landfills plus documentation that 100% of the industrial waste has been recycled and is no longer a liability to the generator.

What does it cost?

Typical cost in \$40 per ton range delivered to Custom Abrasives plant in Houma. Compare this amount to \$60 per ton delivered to an approved landfill.

Beneficial ReUse is your responsible and green solution!
